***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s) 1-7, 12 and 13, drawn to a process of making formula I, IX and X; classified in class 544, subclass 287.

**Group II**, claim(s) 8, 10 and 11, drawn to the intermediate of formula III; classified in class 544, subclass 287.

**Group III**, claim(s) 9, drawn to the intermediate of formula VIII; classified in class 564, subclass 161.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

- a. The inventions of group I is drawn to a process of making compounds of three different formulae.
- b. The inventions of groups II and III are drawn to intermediates of different special technical features. Group II is drawn to compounds of substituted **quinazoline** while Group III is drawn to compounds of substituted **phenyl** which are classified in different

classes. Furthermore, an online search for Group III yields an incomplete search, which indicates a serious burden of searching.

Under 35 U.S.C. 372(b)(2), "international applications designating but not originating in, the United States...the Commissioner may cause the question of unity of invention to be reexamined under section 121 of this title..." Thus, as discussed above, the instant invention clearly lacks unity according to PCT 13.2. Accordingly, restriction under 35 U.S.C. 121 and 372 is deemed necessary.

A telephone call was made to Mr. Leonard Mitchard on 10-7-08 to request an oral election to the above restriction requirement, but a written restriction was requested.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
